## **DETAILED ACTION**

### ***Oath/Declaration***

The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because: it does not include reference to the applications, mentioned in the first page of the specification.

### ***Drawings***

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the limitation "decoder provides the decisions [, the select and path select] signals to the equalizer", as recited in claim 11, must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet,

Art Unit: 2637

and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the examiner does not accept the changes, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Specification***

2. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Please update the status of the related applications mentioned in the specification

### ***Claim Objections***

3. Claim 11, line 3, "and signals" should be "select and path select" so as to be consistent with antecedent in line 2. Appropriate correction is required.

### ***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 9, 10 and 13 are rejected under 35 U.S.C. 102(b) as being anticipated by Marchetto et al US Patent No. 5,513,215.

As per claim 9, Marchetto discloses a directional (multiple) decision feedback equalizer (fig. 13) comprising plural outputs (310 and 312 to be delivered to the Viterbi equalizer (symbol decoder); wherein the respective outputs are buffered by respective memory see fig. 17 elements 378 and 382) (delay elements).

As per claim 10, the equalizer and the Viterbi equalizer (symbol decoder) are formed by an integrated block see block 314 for passing data there between.

As per claim 13, Marchetto further teaches (fig. 15) the equalizer computes all possible candidates (see outputs of combiner 350) for inputs to the Viterbi equalizer (symbol decoder) and selects decisions from the possible candidates (see output of decision circuit 352 and provides the selected inputs to the Viterbi equalizer (symbol decoder) see signal 354 and output of elements 310 and 312.

***Allowable Subject Matter***

9. Claims 1-8 are allowed.

10. Claim 11-12, 14 and 15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

12. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jean B Corrielus whose telephone number is 571-272-3020. The examiner can normally be reached on Maxi-Flex.
